

**SOFTVET**

# **GENTLE PROTECTION BY NATURE**

**PRODUCTS WITH VEGETABLE  
ORIGIN COMPONENTS  
AIMED TO TREAT AND PREVENT**

**SOFTVET PRODUCT LINE OF PROVET TM —  
IS A SOFT AND RELIABLE REPELLENT  
PROTECTION AND SAFETY!**

Softvet products is a combination of innovation and naturalness. The base of the repellent remedies is exceptionally natural oils of geranium, margosa, clove and vanilla extract. The ingredients have an expressed repellent effect to fleas, lice, ticks, as well as to transporters of dangerous diseases - mosquitos, flies. The ingredients of the product are masking unpleasant odour of the animals, improve state of coat and skin. In case of skin irritations and micro wounds, the remedies promote fast regeneration and renovation of epidermis.

**SOFTVET PRODUCTS ARE DEVELOPED  
TO CATS AND DOGS OF ALL BREEDS  
AND AGE GROUPS. THE REMEDY  
CAN BE USED:**

**IN EARLY  
AGE**  
(STARTING  
3-6 WEEKS);

**TO WEAK  
AND SENIOR  
ANIMALS**

**THOSE WITH  
HYPERSENSITIVITY  
TO CHEMICAL  
INSECTICIDES**

**PROTECTION AND SAFETY**

# SPOT-ON

## SOFTVET SPOT-ON IS MODERN AND SAFE REMEDY OF PREVENTION AND SAFETY!

It protects against most common ectoparasites (*fleas, lice, chewing lice, ticks*), bloodsucking insects - transporters of dangerous diseases.

The remedy ingredients are interacted with lipid layer and hair follicles, therefrom vapouring for a long period on the skin and coat surface, thus providing protection against ectoparasites.

## IT CAN BE APPLIED TO KITTENS AND PUPPIES OF 4-WEEKS OLD AND ADULT ANIMALS:

**CUT THE PIPETTE TIP**

**SPLIT ANIMAL'S HAIR  
IN THE USING FINGERS,  
THUS THE SKIN TO BE SEEN**

**PUT SOFTVET DROPS  
ALONG THE BACKBONE**

The processing of animals is carried during seasonal activity of parasites if required, but not often than 1 time in 30 days.

# COLLARS

**SOFTVET REPELLENT COLLAR —  
IS A SAFETY PROTECTION AGAINST  
TICKS, FLEAS, LICE, CHEWING LICE,  
BLOODSUCKING FLYING INSECTS.**

Natural components are gradually vaporizing from the tape surface on the coat and skin of animal, providing repellent effect. The collar is applied to kittens and puppies from 6-weeks age and senior animals as preventive remedy. In case of parasites presence it's recommended to use SOFTVET spot-on preliminary.

## MODE OF USE:

**UNWRAP THE  
COLLAR, DELETE  
SPIRAL JUMPER**

**WEAR THE COLLAR  
LOOSELY, THUS TO LEAVE  
A SPACE OF TWO FINGERS  
BETWEEN THE NECK OF  
ANIMAL AND COLLAR**

**CUT OFF AN  
EXCESSIVE  
END OF TAPE**

**SOFTVET COLLAR IS SAFE TO ALL CAT  
AND DOG BREEDS. THE COLLAR PROVIDES  
REPELLENT PROTECTION UP TO 3 MONTHS.**

# SPRAY

## EXTERNAL USE SOFTVET REPELLENT SPRAY FOR CATS AND DOGS

The product is recommended to cats and dogs of all breeds and age groups, especially to animals with bushy long coat. Natural oils in composition of the product demonstrate active repellent effect and promote easy comb of bushy long coat out in addition.

### APPLICATION:

Shake the bottle thoroughly before use! The remedy is pulverized on the animal's body at distance 10-20 cm by one arm, and the other arm raising the coat up contrary to growth, thus to process not only the coat till complete wetting, but the skin also. It's recommended to process the paw pads also.
