## REPELLENT EFFECT

STOPBIO collar is a remedy for prevention and protection against fleas, chewing lice, ticks and other ectoparasites in cats and dogs.

The action of the collar is soft and impactful due to natural ingredients and special texture of polymeric tape. It is due to the combination of oils features: wormwood, mint, clove, neem tree, which promote repellent effect against ectoparasites, and have positive impact on overall state of skin and coat, promote reduction of itching and irritation in flea allergy dermatitis.

## COMPOSITION

Natural oils of wormwood, mint, clove and neem tree. Polyvinyl chloride tape of correspondent length.

### PROTECTION OF THE ANIMALS AGAINST PARASITES UP TO 3 MONTH

#### APPLICATION

External use application. Take the collar out of package and put on the animal neck, adjust it not tight, thus to leave a space between neck and collar up to 2 cm, then fixed and cut the surplus.

The collar should move free, thus to avoid an animal growth retain. Permanent use of collar provides animal protection of parasites within 4 months.

One collar is per one animal. Depending from the size of animal is used the collar of different length:

- Cats and small dog breeds, puppies and kittens of 6-weeks old - collar 35±5 cm;
- Middle and large dog breeds - collar 70±5cm.
